International Journal of Mass Spectrometry

Subject index

Ab initio calculations
Heats of formation of imine and enamine radical cations and the corresponding neutral molecules, 301
Ab initio molecular orbital calculations
Rearrangement and dissociation of ionized 1,2-diaminoethane, 337
Addition-elimination reactions
Mechanisms of reactions of BH_2^+, $HBOH^+$, and $H_2BOH_2^+$ with H_2O. An experimental gas phase isotope labeling and theoretical ab initio study, 55
Agostic bonding
Gas phase agostic bonding in pyridine SiF_n^+ (n = 1,3) cluster ions investigated by the kinetic method, 195
Aldolase
Accelerator mass spectrometry for assaying irreversible covalent modification of an enzyme by acetoacetic ester, 185
Alkylbenzenes, branched
Large gaseous alkylbenzenium ions. The apparently simultaneous loss of two molecules of benzene from protonated tri- and tetrabenzylmethane, 147
Mobile protons in large gaseous alkylbenzenium ions. The 21-proton equilibration in protonated tetrabenzylmethane and related ''proton dances,'' 129
Alkylbenzenes, protonated
Large gaseous alkylbenzenium ions. The apparently simultaneous loss of two molecules of benzene from protonated tri- and tetrabenzylmethane, 147
Mobile protons in large gaseous alkylbenzenium ions. The 21-proton equilibration in protonated tetrabenzylmethane and related ''proton dances,'' 129
Ammonia loss
Rearrangement and dissociation of ionized 1,2-diaminoethane, 337
APCI of chloroethenes
Experimental and theoretical investigation of gas phase complexes between chloride ion and some chloroethenes, 349
Arenium ions
Large gaseous alkylbenzenium ions. The apparently simultaneous loss of two molecules of benzene from protonated tri- and tetrabenzylmethane, 147
Mobile protons in large gaseous alkylbenzenium ions. The 21-proton equilibration in protonated tetrabenzylmethane and related ''proton dances,'' 129
Azulene
Thermal electron detachment of the molecular anion of azulene at elevated pressures by ion mobility spectrometry, 117

Benzyl acetate $(M\text{-}H)^-$ anions
Formation of two deprotonated forms of benzyl acetate $(M\text{-}H)^-$ anions and higher homologues: some unusual fragmentations, 61
Bidentate complexes
Association of the ammonium ion with α,ω-alkanediols, 1
Bond energies
Gas phase activation of carbon dioxide by niobium and niobium monoxide cations, 103
Molecular beam studies of ammonia clustered with metals produced by pulsed laser reactive ablation, 319
Borohydride ions
Mechanisms of reactions of BH_2^+, $HBOH^+$, and $H_2BOH_2^+$ with H_2O. An experimental gas phase isotope labeling and theoretical ab initio study, 55
Boron–oxygen bond
Mechanisms of reactions of BH_2^+, $HBOH^+$, and $H_2BOH_2^+$ with H_2O. An experimental gas phase isotope labeling and theoretical ab initio study, 55

Calculated binding energies for chloroethenes-chloride ion complexes
Experimental and theoretical investigation of gas phase complexes between chloride ion and some chloroethenes, 349
Carbenes
Generation of neutral and cationic hydrogen shift isomers of pyridine: a combined experimental and computational investigation, 7
Catalysis-proton transport
Gas phase catalyzed keto-enol isomerization of cations by proton transport, 293
CBS-Q
Heats of formation of imine and enamine radical cations and the corresponding neutral molecules, 301

Chemical ionization
Functional group interactions in the fragmentation of protonated and methylated succinic acid derivatives, 15
Chemical ionization mass spectrometry
Reactions of $H_3O^+(H_2O)_n$ and $(CH_3COCH_3)_m$ with CH_3SCH_3, 243
Chloride ion affinity-scale
Experimental and theoretical investigation of gas phase complexes between chloride ion and some chloroethenes, 349
Chloroethenes-chloride ion complexes
Experimental and theoretical investigation of gas phase complexes between chloride ion and some chloroethenes, 349
Cluster ions
Energy partitioning following the infrared photofragmentation of $SF_6.(C_6H_6)^+$ cluster ions, 253
Gas phase agostic bonding in pyridine SiF_n^+ (n = 1,3) cluster ions investigated by the kinetic method, 195
Clusters
Molecular beam studies of ammonia clustered with metals produced by pulsed laser reactive ablation, 319
CO_2 activation
Gas phase activation of carbon dioxide by niobium and niobium monoxide cations, 103
Collisional study
Production and magnetic analysis of beams of S atoms and SO radicals: a collisional study of their interactions with hydrogen molecules, 67
Collision-induced dissociation (CID)
Functional group interactions in the fragmentation of protonated and methylated succinic acid derivatives, 15
Gas-phase Fe^+-assisted cycloaddition reactions of cyclopentadiene with small alkenes and alkynes, 231
Consecutive fragmentation in metastable ions
Large gaseous alkylbenzenium ions. The apparently simultaneous loss of two molecules of benzene from protonated tri- and tetrabenzylmethane, 147
Coupled cluster calculations
Generation of neutral and cationic hydrogen shift isomers of pyridine: a combined experimental and computational investigation, 7
Crosslinking
Accelerator mass spectrometry for assaying irreversible covalent modification of an enzyme by acetoacetic ester, 185
Cyclization reactions
Large gaseous alkylbenzenium ions. The apparently simultaneous loss of two molecules of benzene from protonated tri- and tetrabenzylmethane, 147
Density functional calculations
Generation of neutral and cationic hydrogen shift isomers of pyridine: a combined experimental and computational investigation, 7
Theoretical analysis of ethylene adducts to ion-bombarded porous silica, 27
Derivatized fullerene ions
Gas-phase reactions of fullerene cations C_{60}^{x+} (x = 1–3) with pyridine and pyrrole: formation of ''ball-and-chain'' and ''spindle'' isomers and their interconversion, 267
Dialkyl sulfides
Sulfur–sulfur three-electron bond dissociation enthalpies of dialkyl sulfide dimer radical cations, 43
1,2-Diaminoethane
Rearrangement and dissociation of ionized 1,2-diaminoethane, 337
Diels-Alder reaction
Gas-phase Fe^+-assisted cycloaddition reactions of cyclopentadiene with small alkenes and alkynes, 231
Dimer radical cations
Sulfur–sulfur three-electron bond dissociation enthalpies of dialkyl sulfide dimer radical cations, 43
Dimethylsulfide
Reactions of $H_3O^+(H_2O)_n$ and $(CH_3COCH_3)_m$ with CH_3SCH_3, 243
Distonic ions
Rearrangement and dissociation of ionized 1,2-diaminoethane, 337
Distonic radical ion
Gas-phase negative ion chemistry of molecular fluorine. Synthesis of distonic radical anions and related species, 173
Disulfide radical cations, FT-ICR
Sulfur–sulfur three-electron bond dissociation enthalpies of dialkyl sulfide dimer radical cations, 43

Electron impact
Rearrangement and dissociation of ionized 1,2-diaminoethane, 337
Electrophilic aromatic substitution
Polycondensation of benzyl methyl ether by reaction with gaseous benzyl cations–a potpourri of mechanisms of organic ion/molecule reactions, 207
Electrospray ionization (ESI)
Ionization/molecule reactions of protonated diglycine: an electrospray ionization flow tube reactor experiment, 165
Enamines
Heats of formation of imine and enamine radical cations and the corresponding neutral molecules, 301

Enthalpy of formation
"Thermochemical mimicry" of phenyl and vinyl groups: can it be extended to charged species?, 261
Equilibria measurements
Sulfur–sulfur three-electron bond dissociation enthalpies of dialkyl sulfide dimer radical cations, 43
Ethylene
Theoretical analysis of ethylene adducts to ion-bombarded porous silica, 27

Flowing afterglow
Gas-phase negative ion chemistry of molecular fluorine. Synthesis of distonic radical anions and related species, 173
Fourier transform ion cyclotron resonance (FTICR) mass spectrometry
Gas-phase Fe^+-assisted cycloaddition reactions of cyclopentadiene with small alkenes and alkynes, 231
Fragmentation mechanisms
Functional group interactions in the fragmentation of protonated and methylated succinic acid derivatives, 15
FT-ICR mass spectrometry
Gas phase catalyzed keto-enol isomerization of cations by proton transport, 293
Fullerene ions
Gas-phase reactions of fullerene cations C_{60}^{x+} (x = 1–3) with pyridine and pyrrole: formation of "ball-and-chain" and "spindle" isomers and their interconversion, 267

Gas phase chloride ion clusters
Experimental and theoretical investigation of gas phase complexes between chloride ion and some chloroethenes, 349
Gas-phase Ge ions
Gas-phase ion chemistry of $Ge(OCH_3)_4$, 223
Gas-phase ion-molecule reactions
Gas-phase Fe^+-assisted cycloaddition reactions of cyclopentadiene with small alkenes and alkynes, 231
Gas-solid reactions
Theoretical analysis of ethylene adducts to ion-bombarded porous silica, 27
Germanium tetramethoxide
Gas-phase ion chemistry of $Ge(OCH_3)_4$, 223
G2(MP2)
Heats of formation of imine and enamine radical cations and the corresponding neutral molecules, 301
Guided ion beam mass spectrometry
Gas phase activation of carbon dioxide by niobium and niobium monoxide cations, 103

Heats of formation
Heats of formation of imine and enamine radical cations and the corresponding neutral molecules, 301
High-level ab initio calculations
Exploring the potential energy surfaces of the reactions of $O^+(^4S)$ and $O^+(^2D)$ with ammonia, 77
High pressure mass spectrometry
Association of the ammonium ion with α,ω-alkanediols, 1
Hydrated ammonium ion
Studying protonated ion hydration by infrared spectroscopy of size-selected $NH_4^+(H_2O)_n$ clusters in a free jet expansion, 91
Hydrogen bond
Association of the ammonium ion with α,ω-alkanediols, 1
Studying protonated ion hydration by infrared spectroscopy of size-selected $NH_4^+(H_2O)_n$ clusters in a free jet expansion, 91
Hydrogen-deuterium (H-D) exchange
Ion/molecule reactions of protonated diglycine: an electrospray ionization flow tube reactor experiment, 165

Imines
Heats of formation of imine and enamine radical cations and the corresponding neutral molecules, 301
Infrared (IR) photodissociation of ions
Gas-phase ion chemistry of $Ge(OCH_3)_4$, 223
Infrared photodissociation
Energy partitioning following the infrared photofragmentation of $SF_6.(C_6H_6)^+$ cluster ions, 253
Interaction with H_2
Production and magnetic analysis of beams of S atoms and SO radicals: a collisional study of their interactions with hydrogen molecules, 67
Interstellar synthesis
Proton affinity of cyanogen and association reactions of $C_2N_2H^+$ and $C_2N_2CH^+{}_3$, 285
Iodine oxide anions
Reactions of iodine oxide and iodine oxoacid anion species with nitric acid, 327
Iodine oxoacid anions
Reactions of iodine oxide and iodine oxoacid anion species with nitric acid, 327
Ion association
Association of the ammonium ion with α,ω-alkanediols, 1
Studying protonated ion hydration by infrared spectroscopy of size-selected $NH_4^+(H_2O)_n$ clusters in a free jet expansion, 91
Ion bombardment (IB)
Theoretical analysis of ethylene adducts to ion-bombarded porous silica, 27
Ion complexes
Ion/molecule reactions of protonated diglycine: an electrospray ionization flow tube reactor experiment, 165
Ionization energies
"Thermochemical mimicry" of phenyl and vinyl groups: can it be extended to charged species?, 261

Ion mobility spectrometry
Thermal electron detachment of the molecular anion of azulene at elevated pressures by ion mobility spectrometry, 117
Ion-molecule condensation
Proton affinity of cyanogen and association reactions of $C_2N_2H^+$ and $C_2N_2CH^+{}_3$, 285
Ion-molecule reactions
Reactions of iodine oxide and iodine oxoacid anion species with nitric acid, 327
Ion/molecule reactions
Gas-phase ion chemistry in methylgermane and methylgermane/silane, 277
Gas-phase ion chemistry of $Ge(OCH_3)_4$, 223
Gas-phase negative ion chemistry of molecular fluorine. Synthesis of distonic radical anions and related species, 173
Polycondensation of benzyl methyl ether by reaction with gaseous benzyl cations–a potpourri of mechanisms of organic ion/molecule reactions, 207
Reactions of $H_3O^+(H_2O)_n$ and $(CH_3COCH_3)_m$ with CH_3SCH_3, 243
Ion-neutral complexes
Gas phase catalyzed keto-enol isomerization of cations by proton transport, 293
Ion structures
Functional group interactions in the fragmentation of protonated and methylated succinic acid derivatives, 15
Ion thermodynamics
Association of the ammonium ion with α,ω-alkanediols, 1
Ion trap mass spectrometry
Gas-phase ion chemistry in methylgermane and methylgermane/silane, 277
Isotope labeling
Mechanisms of reactions of $BH^+{}_2$, $HBOH^+$, and $H_2BOH^+{}_2$ with H_2O. An experimental gas phase isotope labeling and theoretical ab initio study, 55
Isotope ratio
Accelerator mass spectrometry for assaying irreversible covalent modification of an enzyme by acetoacetic ester, 185

JCR spectrometry
Polycondensation of benzyl methyl ether by reaction with gaseous benzyl cations–a potpourri of mechanisms of organic ion/molecule reactions, 207
Jet-cooled isomeric clusters
Studying protonated ion hydration by infrared spectroscopy of size-selected $NH_4{}^+(H_2O)_n$ clusters in a free jet expansion, 91

Keto-enol isomerization
Gas phase catalyzed keto-enol isomerization of cations by proton transport, 293

Kinetic energy release
Energy partitioning following the infrared photofragmentation of $SF_6.(C_6H_6)^+$ cluster ions, 253
Kinetic method
Gas phase agostic bonding in pyridine SiF_n^+ (n = 1,3) cluster ions investigated by the kinetic method, 195
Kinetics
Gas-phase ion chemistry in methylgermane and methylgermane/silane, 277

Laser
Molecular beam studies of ammonia clustered with metals produced by pulsed laser reactive ablation, 319
Lewis acidity
Gas phase agostic bonding in pyridine SiF_n^+ (n = 1.3) cluster ions investigated by the kinetic method, 195

Magnetic analysis
Production and magnetic analysis of beams of S atoms and SO radicals: a collisional study of their interactions with hydrogen molecules, 67
Mass spectrometry
Generation of neutral and cationic hydrogen shift isomers of pyridine: a combined experimental and computational investigation, 7
Metal ion chemistry
Gas-phase Fe^+-assisted cycloaddition reactions of cyclopentadiene with small alkenes and alkynes, 231
Methyl cation affinity
Proton affinity of cyanogen and association reactions of $C_2N_2H^+$ and $C_2N_2CH^+{}_3$, 285
Methylgermane
Gas phase ion chemistry in methylgermane and methylgermane/silane, 277
Mobile protons
Large gaseous alkylbenzenium ions. The apparently simultaneous loss of two molecules of benzene from protonated tri- and tetrabenzylmethane, 147
Mobile protons in large gaseous alkylbenzenium ions. The 21-proton equilibration in protonated tetrabenzylmethane and related ''proton dances,'' 129
Molecular beams
Molecular beam studies of ammonia clustered with metals produced by pulsed laser reactive ablation, 319
Molecular fluorine
Gas-phase negative ion chemistry of molecular fluorine. Synthesis of distonic radical anions and related species, 173
Multiply charged ions
Gas-phase reactions of fullerene cations C_{60}^{x+} (x = 1–3) with pyridine and pyrrole: formation of ''ball-and-chain'' and ''spindle'' isomers and their interconversion, 267

Negative ion
Gas-phase negative ion chemistry of molecular fluorine. Synthesis of distonic radical anions and related species, 173
Neutralization-reionization
Generation of neutral and cationic hydrogen shift isomers of pyridine: a combined experimental and computational investigation, 7
Niobium dioxide cations
Gas phase activation of carbon dioxide by niobium and niobium monoxide cations, 103
Niobium monoxide cations
Gas phase activation of carbon dioxide by niobium and niobium monoxide cations, 103
Nitric acid
Reactions of iodine oxide and iodine oxoacid anion species with nitric acid, 327

$O^+ + NH_3$ reactions
Exploring the potential energy surfaces of the reactions of $O^+(^4S)$ and $O^+(^2D)$ with ammonia, 77

Pb oxides
Ion bombardment of PbO_2 films: water influence of cluster production, 309
Peptides
Ion/molecule reactions of protonated diglycine: an electrospray ionization flow tube reactor experiment, 165
Porous silica
Theoretical analysis of ethylene adducts to ion-bombarded porous silica, 27
Potential energy surfaces
Exploring the potential energy surfaces of the reactions of $O^+(^4S)$ and $O^+(^2D)$ with ammonia, 77
Protein
Accelerator mass spectrometry for assaying irreversible covalent modification of an enzyme by acetoacetic ester, 185
Proton affinities
''Thermochemical mimicry'' of phenyl and vinyl groups: can it be extended to charged species?, 261
Proton affinity
Proton affinity of cyanogen and association reactions of $C_2N_2H^+$ and $C_2N_2CH_3^+$, 285
Proton hydrates
Reactions of $H_3O^+(H_2O)_n$ and $(CH_3COCH_3)_m$ with CH_3SCH_3, 243
Proton transfer
Mobile protons in large gaseous alkylbenzenium ions. The 21-proton equilibration in protonated tetrabenzylmethane and related ''proton dances,'' 129
Pyridine
Gas-phase reactions of fullerene cations C_{60}^{x+} (x = 1–3) with pyridine and pyrrole: formation of ''ball-and-chain'' and ''spindle'' isomers and their interconversion, 267
Generation of neutral and cationic hydrogen shift isomers of pyridine: a combined experimental and computational investigation, 7
Pyrrole
Gas-phase reactions of fullerene cations C_{60}^{x+} (x = 1–3) with pyridine and pyrrole: formation of ''ball-and-chain'' and ''spindle'' isomers and their interconversion, 267

Radiocarbon
Accelerator mass spectrometry for assaying irreversible covalent modification of an enzyme by acetoacetic ester, 185
Radiochemical activity
Ion bombardment of PbO_2 films: water influence of cluster production, 309
Rate constants
Reactions of $H_3O^+(H_2O)_n$ and $(CH_3COCH_3)_m$ with CH_3SCH_3, 243
Reactions of iodine oxide and iodine oxoacid anion species with nitric acid, 327
Reaction mechanism
Polycondensation of benzyl methyl ether by reaction with gaseous benzyl cations–a potpourri of mechanisms of organic ion/molecule reactions, 207
Rearrangements on collisional activation
Formation of two deprotonated forms of benzylacetate and higher homologues: some unusual fragmentations, 61
RRKM calculations
Rearrangement and dissociation of ionized 1,2-diaminoethane, 337

S atoms
Production and magnetic analysis of beams of S atoms and SO radicals: a collisional study of their interactions with hydrogen molecules, 67
Selected ion flow tube
Gas-phase reactions of fullerene cations C_{60}^{x+} (x = 1–3) with pyridine and pyrrole: formation of ''ball-and-chain'' and ''spindle'' isomers and their interconversion, 267
SiF^+
Gas phase agostic bonding in pyridine SiF_n^+ (n = 1,3) cluster ions investigated by the kinetic method, 195
$SiF^+{}_3$
Gas phase agostic bonding in pyridine $SiF^+{}_n$ (n = 1,3) cluster ions investigated by the kinetic method, 195
Sift
Ion/molecule reactions of protonated diglycine: an electrospray ionization flow tube reactor experiment, 165

Silane
Gas phase ion chemistry in methylgermane and methylgermane/silane, 277
Silica
Theoretical analysis of ethylene adducts to ion-bombarded porous silica, 27
SIMS
Ion bombardment of PbO_2 films: water influence of cluster production, 309
SO beams
Production and magnetic analysis of beams of S atoms and SO radicals: a collisional study of their interactions with hydrogen molecules, 67
Solid matrix functionalization
Theoretical analysis of ethylene adducts to ion-bombarded porous silica, 27
Spectroscopy
Molecular beam studies of ammonia clustered with metals produced by pulsed laser reactive ablation, 319
Steric effects
Sulfur–sulfur three-electron bond dissociation enthalpies of dialkyl sulfide dimer radical cations, 43
Substituent effects
''Thermochemical mimicry'' of phenyl and vinyl groups: can it be extended to charged species?, 261
Succinic acid derivatives
Functional group interactions in the fragmentation of protonated and methylated succinic acid derivatives, 15
Sulfur–sulfur bond energies
Sulfur–sulfur three-electron bond dissociation enthalpies of dialkyl sulfide dimer radical cations, 43
Surface techniques
Ion bombardment of PbO_2 films: water influence of cluster production, 309

Tandem FA-SIFT
Mechanisms of reactions of $BH^+{}_2$, $HBOH^+$, and $H_2BOH^+{}_2$ with H_2O. An experimental gas phase isotope labeling and theoretical ab initio study, 55
Theoretical calculations
Sulfur–sulfur three-electron bond dissociation enthalpies of dialkyl sulfide dimer radical cations, 43
Thermal electron detachment
Thermal electron detachment of the molecular anion of azulene at elevated pressures by ion mobility spectrometry, 117

Vibrational predissociation spectroscopy
Studying protonated ion hydration by infrared spectroscopy of size-selected $NH_4{}^+(H_2O)n$ clusters in a free jet expansion, 91

Water–Pb oxide interaction
Ion bombardment of PbO_2 films: water influence of cluster production, 309

Ylides
Generation of neutral and cationic hydrogen shift isomers of pyridine: a combined experimental and computational investigation, 7
